

## **INVESTIGATIONS OF AIR-IONS PROCESSES AND DEVELOPMENT OF TECHNOLOGICAL FACILITIES**

**V. I. Sakhno, S. P. Tomchay**

Technologies using the ions of air (airions) have widely adopted in industry. It stimulates the necessity of deep study of the physics of airions and development of new more advanced engineering means for realization of the airions technologies in industry. This article reflects the results of investigation of airions application peculiarities in the technologies of sea-products processing, received by authors.
