

# **THE ELABORATION OF NEW TECHNOLOGICAL SCHEMES OF RADIATION DECONTAMINATION**

**V. I. Sakhno, S. P. Tomchay**

Elaboration results of new technological scheme of radiation decontamination of infected sewage are given. The double-stage scheme of combined processing of infected sewage is offered. The processes, which take place during the decontamination, are analysed. The installation structure with decontamination capacity up to 20 t flows per day is described.
