

## CONCENTRATION PECULIARITIES OF RADIONUCLIDES BY FRESHWATER MOLLUSCS OF CHERNOBYL NPP EXCLUSION ZONE

**D. I. Gudkov, A. B. Nazarov, V. V. Derevets, M. I. Kuzmenko**

The results of radionuclides  $^{90}\text{Sr}$  and  $^{137}\text{Cs}$  content in molluscs tissue of water objects within Chernobyl NPP exclusion zone has been analysed. The age dynamics of radionuclides content in some species of *Gastropoda* was studied.
