

# **PROBLEMS OF VERIFICATION OF SYSTEM CODES FOR MODELING TRANSIENT AND ACCIDENTAL MODES OF NUCLEAR POWER PLANTS**

**E. D. Domashev, M. M. Kovetskaya, A. Yu. Zenyuk, V. N. Kolochko**

We carry out an analysis of using RELAP and CATHARE system codes for modelling accidental modes of nuclear power plants. We show that the problem of modelling heat transfer crisis caused by drying of heat-transfer surfaces under non-stationary conditions.
