## CHANGES IN THE POPULATION STRUCTURE OF STEM RUST AGENT (PUCCINIA GRAMINIS) UNDER LOW DOSE CHRONIC RADIATION

## A. P. Dmitriev, N. I. Guscha, M. S. Krizanovskaya

The data concerning the changes in population structure of *Puccinia graminis*, a causal agent of stem rust under low dose chronic radiation are present. The structure has been changed in 10-km ChNPP zone by appearance of a new population with high frequency of more virulent clones as compared to other regions of Ukraine.
