

# **THE EXPERIMENTAL STUDIES OF $^{137}\text{Cs}$ ELIMINATION PROCESS FROM THE ORGANISM OF FISH**

**E. N. Volkova, V. V. Belyaev, O. S. Potrohov, O. G. Zinkovsky, Z. O. Shirokaya**

The influence of the ration of a feeding of fishes on the process of  $^{137}\text{Cs}$  elimination from the organism was investigated. The inverse dependence between the mass of fishes and specific activity  $^{137}\text{Cs}$  was found. The rations of the feeding of fishes make possible to lower the specific activity of fishes to the recommended level was determined.
